Pycnometer

Specific gravity

IS 2386-3

One-litre glass pycnometer jar with a watertight metal conical screw top, for specific gravity tests to IS 2386 (Part 3).

Request a quote | View online

Description

A glass jar of about one litre with a metal conical screw top. The cone has a 6 mm hole at its tip.

The top screws on watertight, with a rubber or fibre washer in the joint if needed. Matching marks on the jar and the top let you tighten it to the same position every time, so the volume stays the same throughout the test.

Supplied ready for use with operating manual and test certificate. Contact us for configuration options, accessories and calibration services.

Technical specifications
