Density Basket

Specific gravity

IS 2386-3

Wire mesh basket with handle for weighing aggregate under water in specific gravity tests to IS 2386 (Part 3).

Request a quote | View online

Description

The basket hangs from the balance on thin wire so the aggregate can be weighed in water. Mesh is no larger than 6.3 mm and the hangers are no thicker than 1 mm.

It is made of brass or GI with stainless steel wire mesh in 6.3 mm or 4.75 mm, measures about 200 mm across and 200 mm high, and has a carrying handle.

Supplied ready for use with operating manual and test certificate. Contact us for configuration options, accessories and calibration services.
